Education

Lagos State

Lagos, Nigeria

Bachelor of Science in Electronics and Computer Engineering

April 2023 – Present

- Relevant Coursework: Mathematics, Physics, Electronics, Software Engineering, Data Structures & Algorithms, OOP, ML.

Skills

Languages: Python, R, JavaScript, TypeScript

Frameworks: React, Bash, Tailwind, Next.js, Redux, Jest, Django, Pytest,

Developer Tools : Git, Docker, Linux

Database: Redis, PostgreSQL, MongoDB.

CI/CD : GitHub Actions

Experience

Software Engineering Intern

September 2023 - June 2024

Proace International

Nigeria

- Led the development of a real-time KYC and e-commerce data aggregation system, integrating six external APIs to cut customer onboarding time by 30% and reduce data discrepancies by 45%.
- Designed and integrated scalable database solutions with Redis and MongoDB, optimizing data storage and retrieval efficiency while supporting high-traffic applications.
- Leveraged GitHub for version control and CI/CD integration, cutting deployment time by 50% and enhancing team collaboration efficiency by 45%.
- Implemented advanced caching strategies with Redis, reducing database query loads by 60%, decreasing page load times by 30%, and supporting seamless scalability to handle 10x more concurrent users.
- Developed modular and secure components for a cloud-hosted healthcare dashboard, reducing patient data entry errors by 35% and improving UI load times by 50%, integrating CI/CD pipelines and implementing OWASP-based security practices across frontend deployments.

Software Engineering Intern

October 2022 - January 2023

HNG

Nigeria

- Refactored core codebase and optimized algorithms, reducing application load times by 20%, which led to a 50% increase in session duration, a 40% improvement in SEO rankings, and a 25% reduction in server costs.
- Optimized backend services and data pipelines, decreasing processing time by 50% and enabling real-time customer data analysis.
- Built and implemented frontend observability using tools like LogRocket and Sentry, enabling real-time error tracking and reducing debugging time by 40%, while setting up performance monitoring to proactively detect UI regressions.
- Engineered comprehensive tests for React.js components, achieving 95% test coverage, which reduced post-release bugs by 80% and increased deployment confidence and velocity by 50%.

Community Service/Activities

Spelling Bee Nigeria

June 2024 – November 2024

Event Coordinator Assistant

Nigeria

- Led on-site coordination for over 200 participants, streamlining registration and optimizing event flow to ensure a smooth and timely competition schedule.
- Supervised and guided children in high-stakes competition settings, ensuring a structured, focused, and emotionally supportive environment that promoted confidence, discipline, and safety throughout the event.

Google Developer Student Club

February 2023 – Present

Software Engineering Tutor

Nigeria

- Led on-site coordination for over 200 participants, streamlining registration and optimizing event flow to ensure a smooth and timely faculty competition schedule.
- Conducted hands-on coding workshops and tutoring sessions, focusing on fundamental software engineering concepts, methodologies and practical application.
